

LERATO DU PLESSIS

QA / TEST AUTOMATION ENGINEER

Johannesburg, South Africa | leratomokotedi0@gmail.com | [linkedin.com/in/lerato-du-plessis](https://www.linkedin.com/in/lerato-du-plessis) | portfolio-site-bice-rho.vercel.app

SUMMARY

Test Engineer spanning manual QA, REST API testing, and test automation across enterprise consulting and product engineering environments. Builds and maintains automated test frameworks (Playwright, Postman/Newman) to reduce manual regression effort and improve release confidence. Strong SQL for backend/data validation, with hands-on Agile delivery experience and a track record of translating business requirements into robust test coverage.

SKILLS

- Test automation: Playwright (JavaScript/TypeScript), Leapwork, AccelQ
- API testing: Postman & Newman, including JavaScript test scripting and CI-integrated collection runs
- Tooling: Azure DevOps, Jira, Xray
- SQL: Query writing and optimisation for backend validation and data integrity checks
- Full QA lifecycle: Functional, regression, integration, and API testing across Agile Scrum teams

EXPERIENCE

Test Engineer II — LINKITSYSTEMS

Apr 2025 – Present

- Own end-to-end test design and execution across functional, regression, and integration testing, catching defects before release and protecting production stability
- Validate REST API behaviour and data accuracy using Postman, closing gaps between expected and actual system responses
- Write test plans defining scope, timelines, and strategy, giving delivery teams clear visibility into coverage and risk
- Log, triage, and verify defects through to resolution, directly improving system stability and release quality

Analyst — Deloitte

Mar 2023 – Mar 2025

- Designed and executed functional, regression, and integration test cases across multiple concurrent client projects
- Validated API endpoints and responses through Postman-based REST API testing, ensuring data integrity across integrations
- Drove timely defect resolution as an active participant in Agile Scrum ceremonies (standups, sprint planning, retros)
- Partnered with stakeholders to gather requirements and translate them into complete, traceable test coverage
- Authored clear, structured test documentation adopted as a reference across project teams

Junior Analyst — InfinityX Graduate Programme — Deloitte

Jan 2022 – Mar 2023

- Executed predefined test cases, identifying and logging defects with clear reproduction steps
- Tracked bugs through defect management tools from identification to closure
- Maintained test documentation and traceability matrices to support audit and handover
- Reviewed requirements for testability, flagging ambiguities before test design began

EDUCATION

BSc Computer Science & Applied Mathematics — Nelson Mandela University (2019 – 2021)

CERTIFICATIONS

- ISTQB Foundation Level
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Postman: The Complete Guide — REST API Testing
- ACCELQ Automation Engineer
- Fundamental Leapwork Automation for Web Applications
- Salesforce Certified Administrator, Platform App Builder, Platform Developer I
