

LERATO DU PLESSIS

QA / TEST AUTOMATION ENGINEER

Johannesburg, South Africa | leratomokotedi0@gmail.com | [linkedin.com/in/lerato-du-plessis](https://www.linkedin.com/in/lerato-du-plessis) | portfolio-site-bice-rho.vercel.app

SUMMARY

Test Engineer (4+ years) spanning manual, API, and automation testing across consulting and product engineering. Builds Playwright (TS/JS) frameworks (POM, fixture composition, cross-browser and cloud execution via Microsoft Playwright Testing) and Postman/Newman API suites with CI integration. Strong SQL; Azure foundation (AZ-900, AZ-104 in progress) supporting a transition toward SDET and DevOps/Platform Engineering.

SKILLS

- Test automation: Playwright (TS/JS), Leapwork, AccelQ
- API testing: Postman & Newman, JavaScript test scripting, CI-integrated collection runs
- CI/CD & Tooling: Jenkins, Azure DevOps, Jira, Xray
- Cloud: Microsoft Azure (AZ-900 certified; AZ-104 in progress)
- SQL: Query writing and optimisation for backend validation and data integrity checks
- Full QA lifecycle: Functional, regression, integration, API, and security regression testing across Agile Scrum teams

EXPERIENCE

Test Engineer II — LINKITSYSTEMS

Apr 2025 – Present

- Serve as lead QA on core delivery projects, owning end-to-end test design and execution across functional, regression, and integration testing, catching defects before release and protecting production stability
- Built and maintained automated test coverage, reducing manual regression effort
- Validate REST API behaviour and data accuracy using Postman, closing gaps between expected and actual system responses
- Write test plans defining scope, timelines, and strategy, giving delivery teams clear visibility into coverage and risk
- Log, triage, and verify defects through to resolution, directly improving system stability and release quality
- Mentor a junior QA engineer through a structured development plan spanning manual testing foundations to automation

Analyst — Deloitte

Mar 2023 – Mar 2025

- Led QA on multiple concurrent client projects, designing and executing functional, regression, and integration test cases
- Built and maintained automated test coverage to extend regression testing beyond manual capacity
- Validated API endpoints and responses through Postman-based REST API testing, ensuring data integrity across integrations
- Drove timely defect resolution as an active participant in Agile Scrum ceremonies (standups, sprint planning, retros)
- Partnered with stakeholders to gather requirements and translate them into complete, traceable test coverage
- Authored clear, structured test documentation adopted as a reference across project teams

Junior Analyst — InfinityX Graduate Programme — Deloitte

Jan 2022 – Mar 2023

- Executed predefined test cases, identifying and logging defects with clear reproduction steps
- Tracked bugs through defect management tools from identification to closure
- Maintained test documentation and traceability matrices to support audit and handover
- Reviewed requirements for testability, flagging ambiguities before test design began

PERSONAL PROJECTS

EventHub Playwright (TS/JS) Automation Framework

2026

github.com/LeratoDup/eventhub-playwrightFramework

- Built a Playwright (TS/JS) framework using POM architecture with composed fixtures (worker-scoped auth fixture registers throwaway accounts via direct API call, no UI login)
- Implemented security regression coverage verifying XSS/SQLi handling server-side, with test data generated fresh per run
- Configured cross-browser execution locally (Chromium/Firefox/WebKit) and in the cloud via Microsoft Playwright Testing (Azure), authenticating with DefaultAzureCredential
- Covered P0/P1/P2 test plan scope across authentication, event listing/booking, and admin flows

Trello API Test Suite

2026

github.com/LeratoDup/trello-api-test-suite

- Built a Postman/Newman suite covering a full CRUD workflow (create board, lists, card, move card, delete board) with chained requests via environment variables
- Implemented dynamic data generation and nested schema validation, with HTML reporting via Newman's htmlextra reporter
- Containerised the suite in a Jenkins pipeline running in Docker for repeatable CI execution

CERTIFICATIONS

- Playwright (TS/JS) Automation Testing — Rahul Shetty Academy (2026)
- Microsoft Certified: Azure Fundamentals (AZ-900) (2026)
- ISTQB Foundation Level (2025)
- Postman: The Complete Guide — REST API Testing (2026)
- Fundamental Leapwork Automation for Web Applications (2025)
- ACCELQ Automation Engineer (2024)

EDUCATION

BSc Computer Science & Applied Mathematics — Nelson Mandela University

2019 – 2021
